

## **A.S. Création Press Release**

Gummersbach, June 2010

### **The 'Boys and Girls' Collection**

The 'Boys and Girls' collection from A.S. Création brings to the wall what is currently 'in' for the little ones. Fantastic theme worlds –from the steppes of Africa to the fanciful fairy festival – invite the youngsters into friendly colour tones for play and dreaming.

Each series enables you to combine single colour papers and supporting borders to your heart's content. New patterns in all over designs have therefore a calming effect and offer the basis for modern room design in *Mix and Match*. A uniform colour and pattern language harmonises even the most colourful combination.

Cute stars, hearts, stripes and animal motives cavort in the mini world of 'Boys and Girls'. By the elder brothers and sisters it could be cooler but here the themes are fast cars, graffiti typography and Tattoo-Artworks. Colourful children's room classics like blue and rosé as well as luminous green and orange tones meet up with newcomers like asphalt grey, silver and neutrals.
