

## **A.S. Création Press Release**

Gummersbach, June 2010

### **The 'Colourful' Collection**

The 'Colourful' collection places a new colour saturation centre stage. The fresh, lifestyle-oriented hues of the wallpapers provide exciting second-viewing qualities due to their multi-layer structure.

In the living world of 'Colourful', the colour scale makes the collection statement. A contemporary spectrum of colour moves between fashionable lavender, a trendy raw silk tone, fruity green, citrus and vanilla yellow, strawberry red, smoky blue and various café nuances.

A subtle play between colour and embossing is characteristic for the smart surface effect of 'Colourful'. Fine longitudinal embossing, moving high and low effects, grainy structure – coarse and fine interpreted – as well as soft screen optic create a tactile experience on a coloured background
