Gummersbach, December 2010

A.S. Création: SCHÖNER WOHNEN 3 presents four current worlds of wallpaper for 2011

The Gummersbach wallpaper manufacturer A.S. Création and Europe's largest living magazine, SCHÖNER WOHNEN, show in 2011 already their third joint wallpaper line. The new collection demonstrates current furnishing tendencies and shows a tasteful portfolio of lifestyle-oriented, modern wallpapers. The collection fans out into four worlds of style, each of which interprets a contemporary interior design trend.

Wonderful Colour offers expressive nuances in the centre of a classically elegant world of design. Strong red, rich purple and fashionable mustard yellow colour areas of plain structures or act as accented colours in floral designs and block stripes with sandy backgrounds.

White Darkness complements clear and tinted white-shades with powerful trend décor. Cool mauve, ultramarine blue and black create strong contrasts in playful dots and hoops.

Living Nature takes structures from nature and turns them into graphic surfaces. An authentic colour scale of blues, soft browns, off-white and khaki accompanies the optical effect of nature.

Glossy Charm produces exciting, sensual wall pictures in a feminine world of colour comprising mocha and berry tones, cream and silver- grey. The contrast between matt and gloss parts creates an interchange between the subtle and the eccentric.

SCHÖNER WOHNEN Wallpaper Collection 3
