imm cologne 2012 (16.01. – 22.01.)

Frankfurt am Main

Köln

location 3.1 C91A

location 4.2 C-027

Drop by drop - in a class of its own!

Innovative, purist, timeless: Drafts from Porsche Design Studio carry a unique trademark.

The technical origin is reflected in the details: Metallic-like embossed textures, visual effects in brushed aluminium, filigree lines which seem to be lasered into the wallpaper.

The clear style of the STRIPE, CUT and SQUARE series convey elegance and high quality, which is also underlined by the masculine colour scheme in black, white and metallic silver with various shades as well as beige and anthracite tones. Single colours in turquoise and dark red in combination with matching colour stripes ensure distinctive contrasts. Magnetic wallpaper and embossed wall panels complement the stylish collection.

STRIPE

Club atmosphere in puristic elegance: Unobtrusive yet distinctive stripes in various widths and colour combinations present stylish edges and structure living areas with their clear arrangement. Combined with each other or the corresponding uniques, STRIPE produces interesting spatial effects.

CUT

The perfect symbiosis of engineering and aesthetics: A monochrome colour scheme with fine graphics which come together in a distinguished design characterises the CUT series. The reduced outlines of the technically inspired pattern seem almost lasered into the wallpaper. The pattern repeat does not seem to follow any obvious direction. In this way CUT produces a unique homogenous space effect.

SQUARE

Clear graphic motifs which seem to reflect link belts, lines in different thicknesses:

SQUARE is cool elegance in perfection. The refined cast structure produces astonishing effects on the wall and underlines the unusual character of this series.

MAGNETIC

MAGNETIC attracts – in the truest sense of the word - because the printing inks are mixed with metallic pigments. For this reason, pictures, plans and notes can be attached to the wall directly with magnets. A surprising as well as intelligent use which is not assumed of the purist wallpaper in grey and beige metallic. This makes MAGNETIC the ideal wall covering for private studies, studios, consulting rooms and conference rooms.

WALL PANELS

Three dimensionality is not a graphic effect here only. Hand-made WALL PANELS, available in cool white and metallic silver, turn walls into three-dimensional reliefs with tactile structures. With their clear withdrawn designs, the wall panels with a thickness of four to eight millimetres provide distinctive space effect. Their practical advantage: The materials are sound insulating and isolating.

Range: Architects Paper – Design by Porsche Design Studio

Material: non-woven

Content: 51 papers, 4 panels
